

Distributor Project: Calgary Casino

Calgary, Canada

Project Exclusive

Ace Casino, an 80,000sqft showstopper. It is a Vegas-inspired players paradise. It is home to over 638 slots, 26 gaming tables, 12 table poker rooms and so much more, there's something for everyone.

Cooks Construction and Consulting installed 30,000sqft of ASP Access Floors Icon Rigid system in Calgary's Ace Casino. Icon Rigid is designed for environments that require a higher underfloor void space. In many gaming environments, a high void space is necessary to house all power and data/electrical services. Icon Rigid is designed to withstand high loads, providing confidence to hold all machines and equipment at Ace Casino.

Icon Rigid and all Access Flooring systems allow the flexibility to reconfigure a space with minimal disruption. Ace Casino can continue to redevelop their design regularly with quick accessibility to their underfloor services.
