

Distributor Project: Saigon Centre

Ho Chi Minh City, Vietnam

Project Exclusive

A centre of sophistication and elegance, housing top-notch options for shopping, dining, and entertainment. The Saigon Centre is in the heart of Ho Chi Minh City. Its design features a contemporary style blended with the cityscape.

ASP Access Floors supplied our distributor in Vietnam, America Indochina Management (AIM), 15,000m² of our Icon X system. AIM installed the system at the finished floor height of 150mm FFH, allowing for electrical and data underfloor services.

Our Icon X system is designed for commercial environments, proving to be the right choice for the Saigon Centre. It's a long lasting, reliable product built to withstand high traffic areas.
