

Salesforce Tower

Sydney NSW

Project Exclusive

Salesforce Tower, the 253-metre centrepiece of Sydney CBD. Soring as Sydney's tallest office building, the tower showcases modern design and functionality in the new ways of working. It's a building centred on people, delivering efficient use of space.

All aspects of the build and design were centred around wellness and sustainability. Salesforce were deservedly rewarded with WELL Certification at the Platinum Level, the highest certification available from International WELL Building Institute under its WELL Building Standard. This was rewarded because of the key considerations that were made to support the health of the people who will occupy the space. Through the promotion of positive values such as inclusiveness, respect and engagement, and a physical environment that sustains wellness through democratic access to natural light and views, and innovative workspace design that encourages autonomy and flexibility.

A true insight into new office design, setting the futures environmental standard for Sydney's CDB skyline.

BUILDER

Shape

The Access Floor Scoop

ASP Access Floors worked across levels 34 to 53 in the Salesforce Tower. Installing over 22,00mm² of our Access Flooring systems. These included Urban Interlock, Icon Data HPL and Icon X. These ranges supported the sustainability goals of the build, assisting in achieving a Green-star rating of 6.

Our Icon X system was installed widely in office spaces, breakout areas, and boardrooms. Urban Interlock was utilised where tile application finishes were planned. Icon Data HPL, applied in server rooms, providing static-dissipative access floor panels. The Salesforce Tower highlights the diversity of our range, we have an Access Flooring System for all environments. ASP Access Floors offer innovative Access Flooring, sustainable solutions.

Sustainability Trends

Did You Know

First ever building in Sydney to achieve WELL Core and Shell pre-certification rating.

55-story building, Sydney's **tallest office building.**

WELL Certification at the Platinum Level.

Featured Products

ICON X

ICON X is considered the classic system for commercial environments. Featuring the patented ASP Icon Panel with a steel cementitious construction.

ICON DATA HPL

ICON Data HPL is a finished system providing static-dissipative access floor panels.

URBAN INTERLOCK

The ASP Urban Interlock System has been scientifically designed to disseminate load transference through the system to ensure there are zero stress rises and zero deflection within the system.
