

CROWN CASINO

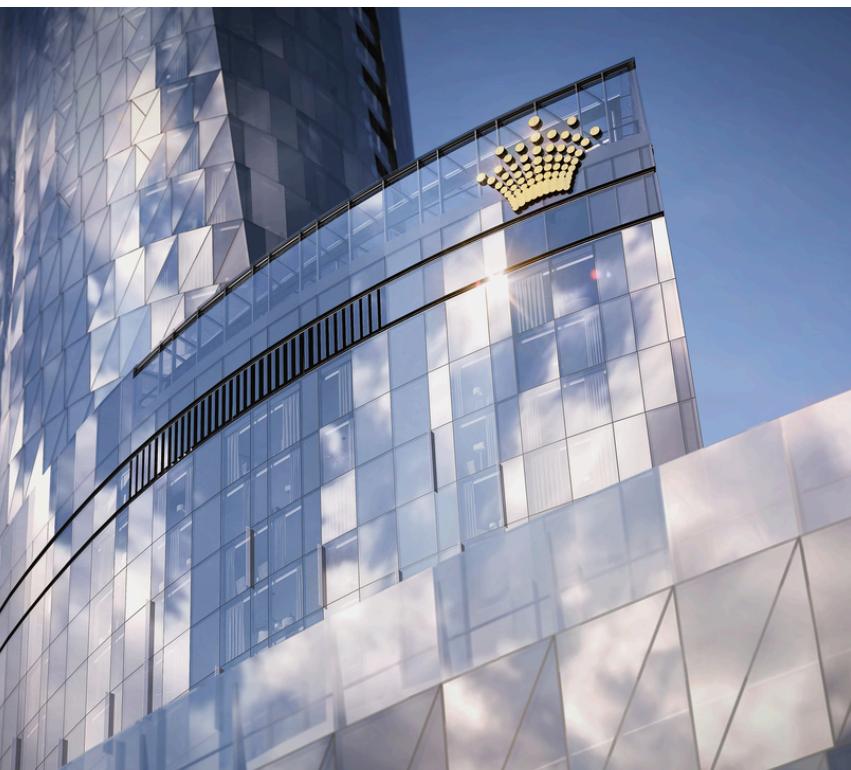

Sydney, Australia

Project Exclusive

Crown Sydney is a premium entertainment and hospitality destination that required a robust access flooring solution to support complex services, luxurious finishes and high-traffic public areas.

ASP supplied ICON HD to ensure long-term structural performance and service accessibility across the development.

THE ACCESS FLOOR SCOOP

ASP supplied 5,110 m² (55,000 sqft) of ICON HD throughout operational spaces, gaming zones and back-of-house areas.

The system provides high load capacity and reliable dimensional stability, supporting a wide range of specialty finishes and heavy-use applications typical of premier entertainment environments.

The raised floor system ensures clear underfloor access for mechanical, electrical and security services, enabling seamless integration with the building's architectural and operational requirements.
